

# About Pigs

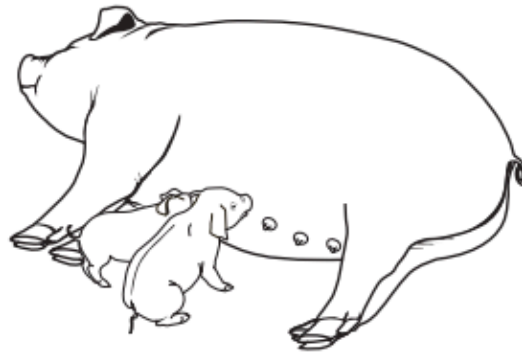

by: \_\_\_\_\_

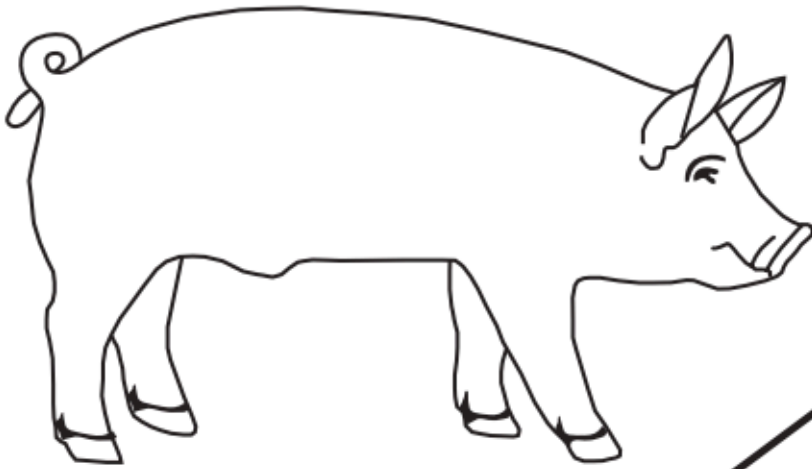

The male or father pig  
is called a \_ \_ \_ \_ .

A mother pig is called a  
\_ \_ \_ and  
a baby pig is called a

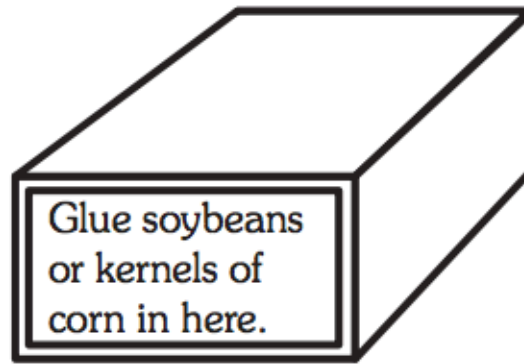

\_ \_ \_ \_ \_ .

When pigs are born they are called piglets.  
The mother pig is called a sow and the father  
pig or hog is called a boar. A sow may have  
between 6 and 18 piglets in her litter. Swine is  
another word used to talk about pigs.

Color this pig light pink.

Glue soybeans  
or kernels of  
corn in here.

Pigs are omnivores. That means they can eat grains, vegetables, fruit, and meat. In the United States, we feed our pigs grain like corn, wheat, and soybeans. Pigs that are fed grain have less fat and more meat.

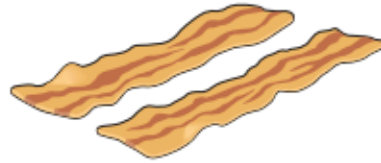

Most hogs are raised in states where corn and soybeans are grown. The top corn states are Illinois, Iowa, Nebraska, Indiana, and Minnesota. Color these corn belt states—the ones with the pig pictures—yellow. Utah ranks 16th in pork production.

Can you name the pork products?  
Draw a line from the word to the pork product.

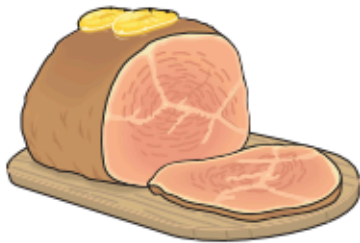

Pepperoni

Hotdog

Sausage

Bacon

Ham

Hogs are raised to provide several pork products. Pig skin is used as leather to make shoes and footballs. Doctors use pig skin for people who have been burned. Pigs are also used to make some medicines.
